Overweight and Obesity Expert Panel

Co-Chairs

Michael D. Jensen, M.D.
Mayo Clinic Endocrine Research Unit
Rochester, MN

Donna H. Ryan, M.D.
Pennington Biomedical Research Center
Baton Rouge, LA

Members

Karen A. Donato, S.M.*
Division for the Application of Research Discoveries
National Heart, Lung, and Blood Institute
Bethesda, MD

Caroline M. Apovian, M.D., F.A.C.P., F.A.C.N.
Boston University School of Medicine
Boston Medical Center
Boston, MA

Jamy D. Ard, M.D.
Wake Forest University Baptist Medical Center
Winston-Salem, NC

Anthony G. Comuzzie, Ph.D.
Southwest Foundation for Biomedical Research
Southwest National Primate Research Center
San Antonio, TX

Frank B. Hu, M.D., Ph.D., M.P.H.
Harvard University School of Public Health
Boston, MA

Van S. Hubbard, M.D., Ph.D.*
Division of Nutrition
Research Coordination
National Institutes of Health
Bethesda, MD

John M. Jakicic, Ph.D.
University of Pittsburgh
Pittsburgh, PA

Robert F. Kushner, M.D.
Northwestern University
Feinberg School of Medicine
Chicago, IL

Catherine M. Loria, Ph.D.*
Division of Cardiovascular Sciences
National Heart, Lung, and Blood Institute
Bethesda, MD

Barbara E. Millen, Dr.P.H., R.D., F.A.D.A.
Boston University School of Medicine
Boston Nutrition Foundation, Inc.
Millennium Prevention, Inc.
Boston, MA

Cathy Nonas, M.S., R.D.
New York City Department of Health and Mental Hygiene
New York, NY

F. Xavier Pi-Sunyer, M.D., M.P.H.
St. Luke’s-Roosevelt Hospital Center
Columbia University
New York, NY

June Stevens, M.S., Ph.D.
University of North Carolina at Chapel Hill
Chapel Hill, NC

Victor J. Stevens, Ph.D.
Kaiser Permanente Center for Health Research
Portland, OR

Thomas A. Wadden, Ph.D.
University of Pennsylvania School of Medicine
Philadelphia, PA

Bruce M. Wolfe, M.D., F.A.C.S.
Oregon Health and Science University
Portland, OR

Susan Z. Yanovski, M.D.*
Division of Digestive Diseases and Nutrition
National Institute of Diabetes and Digestive and Kidney Diseases
Bethesda, MD

### OBESITY GUIDELINES—PART 3

Preface to the Expert Panel Report (comprehensive version which includes Systematic Evidence Review, Evidence Statements, and Recommendations) ................................................................. S40

#### SECTION 1: Background and Description of the NHLBI Cardiovascular Risk Reduction Project

- A. Background ........................................................................................................... S41
- B. Overview of the Evidence-Based Methodology ..................................................... S41
- C. Scope of the Problem ........................................................................................... S43
- D. History .................................................................................................................. S43
- E. Critical Questions on Overweight and Obesity ...................................................... S43
  - i. Critical Questions on Weight-Related Health Risks and Benefits of Weight Loss S43
  - ii. Critical Questions on Treatments for Overweight and Obesity ......................... S44
- F. Challenges of Achieving Weight Loss in Primary Care Practice ......................... S44

#### SECTION 2: Process and Methods Overview

- A. Overview of Evidence-Based Methodology ......................................................... S45
  - i. System for Grading the Body of Evidence ........................................................ S46
  - ii. Peer-Review Process ....................................................................................... S46
- B. Critical Question-Based Approach ..................................................................... S47
  - i. Critical Questions on Overweight and Obesity ................................................ S47

#### SECTION 3: Critical Question 1

- A. Statement of the Question ..................................................................................... S48
  - i. By Population Subgroups ................................................................................ S48
  - ii. By Amount of Weight Loss ............................................................................... S48
  - iii. By Weight Loss Maintenance ......................................................................... S48
- B. Selection of the Inclusion/Exclusion Criteria ....................................................... S48
- C. Introduction and Rationale for Question and Inclusion/Exclusion Criteria ........ S48
- D. Methods for Critical Question 1 ......................................................................... S49
- E. Evidence Statements and Summaries ................................................................. S51
  - i. Weight Loss and Risk for Diabetes: Spreadsheets 1.1.-1.4b. ............................ S51
- F. Weight Loss and Impact on Cholesterol/Lipid Profile—Spreadsheet 1.5a-1.5c. S54
- G. Weight Loss and Hypertension Risk—Spreadsheets 1.6a-f. ............................. S56
- H. Gaps in Evidence and Future Research Needs .................................................. S57

#### SECTION 4: Critical Question 2

- A. Statement of the Question ..................................................................................... S58
  - i. Subgroup Analyses .......................................................................................... S58

(Continued)
B. Selection of the Inclusion/Exclusion Criteria ........................................ S58
C. Introduction and Rationale for Question and Inclusion/Exclusion Criteria ........................................ S58
D. Methods for Critical Question 2 .......................................................... S60
E. Evidence Statements and Summaries ..................................................... S63
   i. BMI Cutpoints and CVD-Related Risk .............................................. S63
   ii. Waist Circumference Cutpoints and CVD-Related Risk ................. S67
F. Recommendations .............................................................................. S68
G. Gaps in Evidence and Future Research Needs ........................................ S69

SECTION 5: Critical Question 3 ................................................................. S70
A. Statement of the Question ................................................................. S70
B. Selection of the Inclusion/Exclusion Criteria ........................................ S70
C. Introduction and Rationale for Question and Inclusion/Exclusion Criteria ........................................ S70
D. Methods for Critical Question 3 .......................................................... S71
E. Evidence Statements and Summaries ..................................................... S74
   i. Creating Reduced Dietary Energy Intake .............................................. S74
   ii. Diets of Differing Forms and Structures (Macronutrient Content, Carbohydrate and Fat Quality, Nutrient Density, Amount of Energy Deficit, Dietary Pattern) or Other Dietary Weight Loss Strategies (e.g., Meal Timing, Portion-Controlled Meal Replacements) ................. S75
   iii. Pattern of Weight Loss Over Time With Dietary Intervention ............. S76
G. Low-Fat Approaches—Summary Table 3.1 ........................................... S77
H. Higher Protein (25 to 30 Percent of Energy) Approaches—Summary Table 3.3 ........................................... S77
I. Low-Carbohydrate (30g/Day) Approaches—Summary Table 3.4 ............ S78
J. Complex Versus Simple Carbohydrates—Summary Table 3.5 ................ S79
K. Glycemic Load Dietary Approaches—Summary Table 3.6 .................... S79
L. Dietary Pattern (Mediterranean Style and Vegetarian and Other Dietary Pattern) Approaches—Summary Table 3.7 ................................................ S79
M. Meal Replacements and Adding Foods to Liquid Diets—Summary Table 3.8 ........................................ S80
N. Very Low-Calorie Diet Approaches—Summary Table 3.9 ...................... S81
O. Recommendations—Dietary Strategies for Weight Loss ........................ S81
P. Gaps in Evidence and Future Research Needs ........................................ S82

SECTION 6: Critical Question 4 ................................................................. S82
A. Statement of the Question ................................................................. S82
B. Selection of the Inclusion/Exclusion Criteria ........................................ S82
C. Introduction and Rationale for Question and Inclusion/Exclusion Criteria ........................................ S83
   i. A Dictionary of Lifestyle Intervention Terms ....................................... S83
   ii. Comprehensive Lifestyle Intervention .............................................. S83
   iii. Intervention Delivery ................................................................. S83
   iv. Intervention Intensity ................................................................. S83
   v. Intervention Duration ................................................................. S84
   vi. Individual Versus Group Intervention .............................................. S84
   vii. Trained Interventionist ............................................................... S84
   viii. Trials of Weight Loss Induction Versus Maintenance of Lost Weight .. S84

Table B-10. CQ1 Studies Rated as Poor With Rationale ........................................ S176
Table B-11. CQ2 Studies Rated Fair or Good .................................................. S178
Table B-12. CQ2 Studies Rated as Poor With Rationale ...................................... S179
Table B-13. CQ3 Studies Rated Fair or Good .................................................. S181
Table B-14. CQ3 Studies Rated Poor With Rationale ......................................... S182
Table B-15. CQ4 Studies Rated Fair or Good .................................................. S188
Table B-16. CQ4 Studies Rated Poor With Rationale ......................................... S192
Table B-17. CQ5 Studies Rated Fair or Good .................................................. S200
Table B-18. CQ5 Studies Rated Poor With Rationale ......................................... S202

LIST OF SPREADSHEET TABLES

Spreadsheet 1.1. Effect of Weight Loss From Lifestyle Interventions in Patients With Diabetes on Blood Glucose and HbA1c .................................. S206
Spreadsheet 1.2. Effect of Weight Loss From Lifestyle Interventions in Persons at Risk for Developing Diabetes (Prediabetes) on Risk for Converting to Type 2 Diabetes ................................................. S207
Spreadsheet 1.3. Effect of Intentional Weight Loss From Lifestyle Interventions in Patients With or Without Diabetes on Mortality ........................................ S208
Spreadsheet 1.4A. Effect of Weight Loss From Orlistat Interventions in Patients With Diabetes on Blood Glucose and HbA1c .................................. S209
Spreadsheet 1.4B. Effect of Weight Loss From Orlistat Interventions in Patients at Risk for Diabetes on Blood Glucose and HbA1c .................................. S209
Spreadsheet 1.5A. Effect of Weight Loss on Serum Lipids: Lifestyle Interventions .......................................................... S210
Spreadsheet 1.5B. Effect of Weight Loss on Serum Lipids: Orlistat Interventions .......................................................... S213
Spreadsheet 1.5C. Effect of Weight Loss on Serum Lipids: Diabetes Subjects .......................................................... S215
Spreadsheet 1.6A. Weight Loss and Hypertension Risk: Orlistat Trials, All Subjects .......................................................... S217
Spreadsheet 1.6B. Weight Loss and Hypertension Risk: Orlistat Trials, Diabetes Subjects .......................................................... S219
Spreadsheet 1.6C. Weight Loss and Hypertension Risk: Hypertension Subjects .......................................................... S219
Spreadsheet 1.6D. Weight Loss and Hypertension Risk: Lifestyles Trials, All Subjects .......................................................... S220
Spreadsheet 1.6E. Weight Loss and Hypertension Risk: Lifestyles Trials, Diabetes Subjects .......................................................... S221
Spreadsheet 1.6F. Weight Loss and Hypertension Risk: Lifestyles Trials, Hypertension Subjects .......................................................... S222

Spreadsheet 2.1. Study Descriptives ................................................................. S223
Spreadsheet 2.2.1A. Combined Fatal and Nonfatal CHD—Results for BMI .......................................................... S227
Spreadsheet 2.2.1B. Fatal CHD—Results for BMI .......................................................... S228
Spreadsheet 2.2.2A. Combined Fatal and Nonfatal Stroke—Results for BMI .......................................................... S228
Spreadsheet 2.2.2B. Fatal Stroke—Results for BMI .......................................................... S229
Spreadsheet 2.2.3A. Combined Fatal and Nonfatal CVD—Results for BMI .......................................................... S230
Spreadsheet 2.2.3B. Fatal CVD—Results for BMI .......................................................... S230
Spreadsheet 2.2.4. Incident Diabetes—Results for BMI .......................................................... S231
Spreadsheet 2.2.5. Overall Mortality—Results for BMI .......................................................... S232
Spreadsheet 2.3.1. Combined Fatal and Nonfatal CHD—Results for Waist Circumference .......................................................... S234

List of Summary Tables

Summary Table 3.1. Overall Dietary Intervention and Composition ........................................ S237
Summary Table 3.2. Low-Fat Approaches .............................................................................. S251
Summary Table 3.3. Higher (25-30% of Energy) Protein Approaches ................................. S259
Summary Table 3.4. Low Carbohydrate Approaches (<30 g/day for at least a period) ......... S269
Summary Table 3.5. Complex Versus Simple Carbohydrates ............................................. S272
Summary Table 3.6. Glycemic Load Dietary Approaches..................................................... S273
Summary Table 3.7. CQ3—Dietary Patterns (Mediterranean Style and Vegetarian and
Other Dietary Pattern Approaches) .................................................................................. S275
Summary Table 3.8. Meal Replacements and Adding Foods to Liquid Diets ......................... S282
Summary Table 3.9. Very Low-Calorie-Diet (VLCD) Approaches ..................................... S284
Summary Table 4.1. Diet, Physical Activity, and Behavior Therapy Components in
High-Intensity, Onsite Lifestyle Interventions .................................................................. S287
Summary Table 4.1A. Weight Loss Trials Compared With Usual Care, Minimal Care, or No Care Control Interventions: Outcome Data at 6 Months or Less as First Time Period Reporting .................................................. S287
Summary Table 4.1B. Weight Loss Trials Compared With Usual Care, Minimal Care, or No Care Control Interventions: Outcome Data at Greater Than 6 Months as First Time Period Reporting .................................................. S291
Summary Table 4.1C. Weight Loss Trials Compared With Usual Care, Minimal Care, or No Care Control Interventions: Outcome Data at Greater Than 12 Months as First Time Period Reporting .................................................. S293
Summary Table 4.2. Evidence for the Comprehensive Interventions Compared With Usual Care, Minimal Care, or No-Treatment Control ..................................................... S294
Summary Table 4.2A. Weight Loss Trials Compared With Usual Care, Minimal Care, or No Care Control Interventions: Outcome Data at 6 Months or Less as First Time Period Reporting .................................................. S294
Summary Table 4.2B. Weight Loss Trials Compared With Usual Care, Minimal Care, or No Care Control Interventions: Outcome Data at Greater Than 6 Months as First Time Period Reporting .................................................. S298
Summary Table 4.2C. Weight Loss Trials Compared With Usual Care, Minimal Care, or No Care Control Interventions: Outcome Data at Greater Than 12 Months as First Time Period Reporting .................................................. S300
Summary Table 4.2D. Comprehensive Interventions Compared to Other Comprehensive Intervention That Varied the Physical Activity or Behavior Therapy Component: Outcome Data at 6 Months or Less as the First Time Period Reported .................................................. S301
